

VBOLT ENGINEERING SERVICES

Engineers, Contractors & Interior Decorators

Company Profile

The Company started under the guidance of Engineer Shahid Anwer with a very small capital to execute projects. Our promoters had very rich experience of the trade and had inputs from various consultants with the responsibility of upgrading the designing and working. The company is professionally managed and manned by qualified and experienced technical personnel at all levels to pool their expertise in high rise structures, industrial complexes, and shopping malls. Every new project is a new experience for us with a specific demand of the architect & consultant asking for unique combinations of exteriors and interiors. Thus, we believe in a continuous up gradation of designs and systems to provide the largest development available to the customer.

Specialisation

The company is fully equipped with complete in-house facilities in areas namely MEP, Interior Decorator, Wooden Works, all types of partitions & Civil maintenance under fully skilled team and contracting agencies. There is no doubt cost control with the company's sincere dedication, professional attitude and innovative technology help in constructing its products at affordable rates to the clients.

Sincere & proper planning results in successful projects and client satisfaction. Thus a good and healthy relationship with clients generates market reputation, which leads to company growth. The services offered to cover an entire range from conceptual planning to execution.

The company is basically connected with the construction industry and at the present time the industry is looking for a sharp boom

Vision Mission

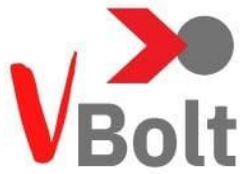

Our mission is to fulfill all the needs of our esteemed clients. We believe in serving our customers with best quality and integrity. We wish to bring about a positive change in the field of building and contracting through technological innovations and practice.
